

Logitech International SA - Climate Change 2019

C0. Introduction

C0.1

(C0.1) Give a general description and introduction to your organization.

Logitech is a multi-brand, multi-category company. We design products that enable better experiences consuming, sharing and creating any digital content, including music, gaming, video and computing, whether it is on a computer, mobile device or in the cloud. Our products fall into five main markets:

- Music: Mobile Speakers, PC speakers, PC headsets, in-ear headphones and premium wireless audio wearables. Our newly acquired microphone product line offers a range of audio tools for recording and broadcasting applications.
- Gaming: PC and console gaming products, including virtual and augmented reality. We design and engineer industry-leading keyboards, mice, headsets, mousepads, controllers and simulation products such as steering wheels and flight sticks.
- Video Collaboration: includes Conference Cams, with enterprise-quality audio and high definition (HD) 1080p video to bring video conferencing to businesses of any size.
- Smart Home: includes advanced home entertainment controllers and home cameras as well as new products to control connected smart home devices and enable smart home security
- Creativity and Productivity: including pointing devices, keyboards and combos, tablet and other accessories and webcams.

The Logitech family currently comprises five master brands: Logitech, Logitech G, ASTRO Gaming, Ultimate Ears, Jaybird, and Blue Microphones.

On August 11, 2017, we acquired the ASTRO Gaming business (ASTRO). ASTRO is a leading console gaming accessory brand with a history of producing award-winning headsets for professional gamers and enthusiasts. ASTRO provides a strong growth platform in the console gaming accessories market. The scope of this Sustainability Report includes data and performance from this acquisition.

On August 21, 2018, we acquired all equity interests in Blue Microphones Holding Corporation (Blue Microphones) for a total consideration of \$134.8 million in cash (the Blue Microphones Acquisition), which includes a working capital adjustment and repayment of debt on behalf of Blue Microphones. Blue Microphones is a leading audio manufacturer that designs and produces microphones, headphones, recording tools, and accessories for audio professionals, musicians and consumers. The Blue Microphones Acquisition supplements our product portfolio. The scope of this Sustainability Report does not include data and performance associated with this acquisition as the Logitech-Blue integration process was ongoing within the reporting period.

Our registered office and holding company (Logitech International S.A.) is in Switzerland. Logitech Inc. is our principal wholly-owned subsidiary in the United States. Our network of offices worldwide employs includes 13 Principal Offices and a number of smaller (sales-focused) offices.

We employ more than 7,000 people worldwide. We have one high-volume manufacturing facility in Suzhou, China where we employ more than 3,200 staff. On-site activities primarily comprise final assembly and testing. Components are manufactured to our specification by third-party suppliers in Asia, the United States and Europe. Approximately half of our annual revenue is generated from products manufactured at our own facility, with components from component suppliers. The other half of our annual revenue (approx) is generated from products manufactured by contract manufacturers. Our local and international teams maintain oversight of all inhouse and supplier production activities, quality process controls and sustainability performance, including energy and greenhouse gas performance.

Our Energy and GHG inventory includes all Scope 1 and 2 emissions from our manufacturing facility. Scope 1 emissions arise due to fuel and refrigerants. Scope 2 emissions arise from electricity. We are working to expand our Energy and GHG inventory to include Scope 3 emissions and have started to report Scope 3 emissions as part of our annual Sustainability Report

We focus on reducing our impact in our own manufacturing facility and across our value chain, taking action against climate change and driving sustainability across the business.

As per previous years, we continue to report by calendar year. This submission reports data from CY7 and CY18 and describes our approach, strategy, organisational structure and performance during that period.

C0.2

(C0.2) State the start and end date of the year for which you are reporting data.

	Start date	End date	Indicate if you are providing emissions data for past reporting years	Select the number of past reporting years you will be providing emissions data for
Row 1	January 1 2018	December 31 2018	Yes	1 year

C0.3

(C0.3) Select the countries/regions for which you will be supplying data.

China

C0.4

(C0.4) Select the currency used for all financial information disclosed throughout your response.

USD

C0.5

(C0.5) Select the option that describes the reporting boundary for which climate-related impacts on your business are being reported. Note that this option should align with your consolidation approach to your Scope 1 and Scope 2 greenhouse gas inventory.

Operational control

C1. Governance

C1.1

(C1.1) Is there board-level oversight of climate-related issues within your organization?

No

C1.1c

(C1.1c) Why is there no board-level oversight of climate-related issues and what are your plans to change this in the future?

	Primary reason	Board-level oversight of climate-related issues will be introduced within the next two years	Please explain
Row 1	Not planned at this time	Yes, we plan to do so within the next two years	

C1.2

(C1.2) Provide the highest management-level position(s) or committee(s) with responsibility for climate-related issues.

Name of the position(s) and/or committee(s)	Responsibility	Frequency of reporting to the board on climate-related issues
Other, please specify (Head of Global Operations)	Managing climate-related risks and opportunities	Not reported to the board
Other, please specify (Sr. Director, Head of Sustainability)	Both assessing and managing climate-related risks and opportunities	Not reported to the board

C1.2a

(C1.2a) Describe where in the organizational structure this/these position(s) and/or committees lie, what their associated responsibilities are, and how climate-related issues are monitored (do not include the names of individuals).

The highest level of responsibility for climate change rests with the Head of Global Operations, who manages Logitech's worldwide operations and global Sustainability team. The Head of Global Operations reports directly to the President and CEO, who is on the Board of Directors.

The Sr. Director, Head of Sustainability manages Logitech's global Sustainability Team and work to assess and manage climate-related risks and opportunities. The Sr. Director, Head of Sustainability reports to the Head of Global Operations.

C1.3

(C1.3) Do you provide incentives for the management of climate-related issues, including the attainment of targets?

No

C2. Risks and opportunities

C2.1

(C2.1) Describe what your organization considers to be short-, medium- and long-term horizons.

	From (years)	To (years)	Comment
Short-term	0	2	
Medium-term	2	5	
Long-term	5	10	

C2.2

(C2.2) Select the option that best describes how your organization's processes for identifying, assessing, and managing climate-related issues are integrated into your overall risk management.

There are no documented processes for identifying, assessing, and managing climate-related issues

C2.2e

(C2.2e) Why does your organization not have a process in place for identifying, assessing, and managing climate-related risks and opportunities, and do you plan to introduce such a process in the future?

	Primary reason	Please explain
Row 1	Important but not an immediate business priority	

C2.3

(C2.3) Have you identified any inherent climate-related risks with the potential to have a substantive financial or strategic impact on your business?

No

C2.3b

(C2.3b) Why do you not consider your organization to be exposed to climate-related risks with the potential to have a substantive financial or strategic impact on your business?

	Primary reason	Please explain
Row 1	Not yet evaluated	

C2.4

(C2.4) Have you identified any climate-related opportunities with the potential to have a substantive financial or strategic impact on your business?

No

C2.4b

(C2.4b) Why do you not consider your organization to have climate-related opportunities?

	Primary reason	Please explain
Row 1	Not yet evaluated	

C3. Business Strategy

C3.1

(C3.1) Are climate-related issues integrated into your business strategy?

Yes

C3.1a

(C3.1a) Does your organization use climate-related scenario analysis to inform your business strategy?
Yes, qualitative and quantitative

C3.1c

(C3.1c) Explain how climate-related issues are integrated into your business objectives and strategy.

Energy & Greenhouse Gases is recognised to be a material aspect of our sustainability performance, as shown in the Materiality Assessment that we include in our annual Sustainability Report each year. We have an established Strategic Management Program for Energy and Greenhouse Gases, which is a global programme covering all activities and operations. This program is founded on our commitment to continual improvement and international good practice including the RBA Code of Conduct, Greenhouse Gas Protocol and Global Reporting Initiative standards. The program includes corporate level targets for greenhouse gas emission reductions, carbon neutrality and renewable electricity.

We have a global Sustainability Team, who lead, manage and inform the development of the Program in partnership with the management team at our manufacturing facility. The Head of that team (Sr Director, Head of Sustainability) reports to our Head of Global Operations. The Head of Global Operations is our executive-level Program Sponsor and reports to our CEO & President, who is on our Board of Directors

C3.1d

(C3.1d) Provide details of your organization's use of climate-related scenario analysis.

Climate-related scenarios	Details
Other, please specify (SBTi-Sectoral Decarbonization approach)	We are using the Science Based Target Initiative Manual and Sectoral Decarbonization Approach to model and forecast emissions from our manufacturing facility and develop science-based targets, which will form part of our business strategy for the future. Our current assessment indicates our commitment to 100% renewable electricity at our manufacturing facility will provide a mechanism for achieving a science-based emission target for Scope 1 and 2 emissions at our factory. Over the next year, we will begin the process of building out our Corporate Carbon Footprint using scenario analysis to model scope 3 emissions, define science-based targets for other aspects of our corporate carbon footprint and participate in the Science-Based Target Initiative

C4. Targets and performance

C4.1

(C4.1) Did you have an emissions target that was active in the reporting year?
Absolute target

C4.1a

(C4.1a) Provide details of your absolute emissions target(s) and progress made against those targets.

Target reference number

Abs 1

Scope

Scope 1 +2 (market-based)

% emissions in Scope

100

Targeted % reduction from base year

20

Base year

2010

Start year

2010

Base year emissions covered by target (metric tons CO2e)

16971

Target year

2018

Is this a science-based target?

No, but we anticipate setting one in the next 2 years

% of target achieved

100

Target status

Achieved

Please explain

In 2013 we set ourselves the target to reduce the absolute Scope 1 and 2 GHG emissions of our manufacturing facility by 20% by 2018. We are delighted to report we have achieved that target. This year, and for the first time, our manufacturing facility is certified CarbonNeutral(R). This means the carbon footprint of the facility has been reduced to net zero through the purchase of iRECs and carbon offsets that meet the requirements of the CarbonNeutral Protocol(R). We are committed to maintaining carbon neutrality, going forward

C4.2

(C4.2) Provide details of other key climate-related targets not already reported in question C4.1/a/b.

C4.3

(C4.3) Did you have emissions reduction initiatives that were active within the reporting year? Note that this can include those in the planning and/or implementation phases.

Yes

C4.3a

(C4.3a) Identify the total number of initiatives at each stage of development, and for those in the implementation stages, the estimated CO2e savings.

	Number of initiatives	Total estimated annual CO2e savings in metric tonnes CO2e (only for rows marked *)
Under investigation		
To be implemented*		
Implementation commenced*		
Implemented*	3	17389
Not to be implemented		

C4.3b

(C4.3b) Provide details on the initiatives implemented in the reporting year in the table below.

Initiative type

Low-carbon energy purchase

Description of initiative

Other, please specify (International Renewable Energy Certificates (iRECs))

Estimated annual CO2e savings (metric tonnes CO2e)

15168

Scope

Scope 2 (market-based)

Voluntary/Mandatory

Voluntary

Annual monetary savings (unit currency – as specified in C0.4)

Investment required (unit currency – as specified in C0.4)

Payback period

Please select

Estimated lifetime of the initiative

Please select

Comment

IRECS used to reduce our Market based Scope 2 emissions to 0.

Initiative type

Other, please specify (Carbon Offsets)

Description of initiative

<Not Applicable>

Estimated annual CO2e savings (metric tonnes CO2e)

553

Scope

Description of initiative

<Not Applicable>

Estimated annual CO2e savings (metric tonnes CO2e)

1668

Scope

Scope 3

Voluntary/Mandatory

Voluntary

Annual monetary savings (unit currency – as specified in C0.4)

Investment required (unit currency – as specified in C0.4)

Payback period

Please select

Estimated lifetime of the initiative

Please select

Comment

Carbon Offsets used to reduce our Scope 3 emissions from Fuel-and-energy-related activities (not included in Scope 1 or 2), Waste generated in operations and Hot water Usage to 0.

C4.3c

(C4.3c) What methods do you use to drive investment in emissions reduction activities?

Method	Comment
Financial optimization calculations	Decision-making related to our Energy and Greenhouse Gas Management Program is informed by robust cost-benefit analysis with the goal of optimising return on investment
Employee engagement	The Sustainability Team facilitates discussions with the Leadership Team and employees to share company performance and agree any investments and actions needed

C4.5

(C4.5) Do you classify any of your existing goods and/or services as low-carbon products or do they enable a third party to avoid GHG emissions?

Yes

C4.5a

(C4.5a) Provide details of your products and/or services that you classify as low-carbon products or that enable a third party to avoid GHG emissions.

Level of aggregation

Product

Description of product/Group of products

Video Conferencing equipment

Are these low-carbon product(s) or do they enable avoided emissions?

Avoided emissions

Taxonomy, project or methodology used to classify product(s) as low-carbon or to calculate avoided emissions

Other, please specify (Internal Study)

% revenue from low carbon product(s) in the reporting year

Comment

We make products and solutions that enable real time video, audio and content sharing capability for business and individuals. These products are used by our own employees and consumers and reduce the need for business and other travel, and scope 3 emissions. To quantify, capture and communicate the environmental benefits associated with this approach, we worked with CO2Logic to develop a tool to measure the associated carbon (and other) savings. This tool is being used to drive increased uptake of video-conferencing and appropriate work from home within Logitech.

C5. Emissions methodology

C5.1

(C5.1) Provide your base year and base year emissions (Scopes 1 and 2).

Scope 1

Base year start

January 1 2010

Base year end

December 31 2010

Base year emissions (metric tons CO2e)

1194

Comment

Scope 2 (location-based)

Base year start

December 31 2017

Comment

C6.2

(C6.2) Describe your organization's approach to reporting Scope 2 emissions.

Row 1

Scope 2, location-based

We are reporting a Scope 2, location-based figure

Scope 2, market-based

We are reporting a Scope 2, market-based figure

Comment

C6.3

(C6.3) What were your organization's gross global Scope 2 emissions in metric tons CO2e?

Reporting year

Scope 2, location-based

15168

Scope 2, market-based (if applicable)

0

Start date

January 1 2018

End date

December 31 2018

Comment

We purchased IRECS to address 22,948 MWh of electricity to bring our Scope 2, market based emissions to 0 T CO2

Past year 1

Scope 2, location-based

17239

Scope 2, market-based (if applicable)

12419

Start date

January 1 2017

End date

December 31 2017

Comment

We purchased IRECS to address 5,954 MWh of electricity to bring our Scope 2, market based emissions to 12,419 T CO2

C6.4

(C6.4) Are there any sources (e.g. facilities, specific GHGs, activities, geographies, etc.) of Scope 1 and Scope 2 emissions that are within your selected reporting boundary which are not included in your disclosure?

No

C6.5

(C6.5) Account for your organization's Scope 3 emissions, disclosing and explaining any exclusions.

Purchased goods and services

Evaluation status

Relevant, calculated

Metric tonnes CO₂e

110000

Emissions calculation methodology

We have not yet quantified the full footprint of Purchase Goods and Services The carbon reported here relates to energy from manufacturing in Tier 1 (direct) suppliers. In CY18, we surveyed Tier 1 (direct) suppliers accounting for 81% of our direct spend on supplier manufacturing and we received data from 73% of suppliers. Using assumptions we have extrapolated the survey data to estimate the total emissions from energy associated with direct supplier manufacturing.

Percentage of emissions calculated using data obtained from suppliers or value chain partners

Explanation

We have not yet quantified the full footprint of Purchase Goods and Services The carbon reported here relates to our Tier 1 (direct) suppliers. We are working to develop our Corporate Carbon Footprint to understand the full scope of carbon from Purchased Goods and Services

Capital goods

Emissions calculation methodology

The waste generated is multiplied times the emission factors

Percentage of emissions calculated using data obtained from suppliers or value chain partners

Explanation

Waste generated at our China production facility

Business travel

Evaluation status

Relevant, calculated

Metric tonnes CO2e

4885

Emissions calculation methodology

This represents our emissions for Air Business travel and the data is provided by our Third party travel partners

Percentage of emissions calculated using data obtained from suppliers or value chain partners

Explanation

In CY18, we transitioned to a centralised system to capture, track and report business-related air travel. This new system is helping us to automate data collection, increase the visibility of business travel emissions and understand this important segment of our corporate carbon footprint. From the data we have collected to date, we have estimated the carbon footprint of business travel in CY18.

Explanation

C6.7

(C6.7) Are carbon dioxide emissions from biologically sequestered carbon relevant to your organization?

No

C6.10

(C6.10) Describe your gross global combined Scope 1 and 2 emissions for the reporting year in metric tons CO2e per unit currency total revenue and provide any additional intensity metrics that are appropriate to your business operations.

Intensity figure

0

Metric numerator (Gross global combined Scope 1 and 2 emissions)

0

Metric denominator

Other, please specify (Revenue (Million USD))

Metric denominator: Unit total

2788

Scope 2 figure used

Market-based

% change from previous year

100

Direction of change

Decreased

Reason for change

Carbon intensity has decreased to zero for Scope 1 and 2 emissions because our manufacturing facility is now carbon neutral

C7. Emissions breakdowns

C7.1

(C7.1) Does your organization break down its Scope 1 emissions by greenhouse gas type?

Yes

C7.1a

(C7.1a) Break down your total gross global Scope 1 emissions by greenhouse gas type and provide the source of each used greenhouse warming potential (GWP).

Greenhouse gas	Scope 1 emissions (metric tons of CO ₂ e)	GWP Reference
CO ₂	45.92	Other, please specify (DEFRA 2016) 2018 Data
CH ₄	0.09	Other, please specify (DEFRA 2016) 2018 Data
N ₂ O	0.2	Other, please specify (DEFRA 2016) 2018 data
HFCs	506.45	Other, please specify (DEFRA 2016) 2018 data

C7.2

(C7.2) Break down your total gross global Scope 1 emissions by country/region.

Country/Region	Scope 1 emissions (metric tons CO ₂ e)
China	553

C7.3

(C7.3) Indicate which gross global Scope 1 emissions breakdowns you are able to provide.

By activity

C7.3c

(C7.3c) Break down your total gross global Scope 1 emissions by business activity.

Activity	Scope 1 emissions (metric tons CO ₂ e)
Fuel- Diesel Type- From Mobile and Stationary Combustion Activity- Power generators, Vehicles and forklifts For year 2018	19
Fuel- Petrol Type- From Mobile Combustion Activity- Company Vehicles For year 2018	27
Fuel- HFC-134a Type- From HFC Sources Activity- Used in Chillers in factory for HVAC For year 2018	172
Fuel- HCFC-22 Type- From HFC Sources Activity- Used for Heat-pump of HVAC and small AC units in the factory For year 2018	335

C7.5

(C7.5) Break down your total gross global Scope 2 emissions by country/region.

Country/Region	Scope 2, location-based (metric tons CO ₂ e)	Scope 2, market-based (metric tons CO ₂ e)	Purchased and consumed electricity, heat, steam or cooling (MWh)	Purchased and consumed low-carbon electricity, heat, steam or cooling accounted in market-based approach (MWh)
China	15168	0	22948	22948

C7.6

(C7.6) Indicate which gross global Scope 2 emissions breakdowns you are able to provide.
By facility

C7.6b

(C7.6b) Break down your total gross global Scope 2 emissions by business facility.

Facility	Scope 2 location-based emissions (metric tons CO2e)	Scope 2, market-based emissions (metric tons CO2e)
Include our factory and dormitories in Suzhou, China	15168	0

C7.9

(C7.9) How do your gross global emissions (Scope 1 and 2 combined) for the reporting year compare to those of the previous reporting year?
Decreased

C7.9a

(C7.9a) Identify the reasons for any change in your gross global emissions (Scope 1 and 2 combined) and for each of them specify how your emissions compare to the previous year.

	Change in emissions (metric tons CO2e)	Direction of change	Emissions value (percentage)	Please explain calculation
Change in renewable energy consumption	13200	Decreased	100	Our CY 17 Scope 1 and Market Based Scope 2 emissions were 13,200 TCO2. In CY18 With the purchase of iRECS and offsets we addressed those emissions and achieved carbon neutrality for the first time. Our production facility is certified CarbonNeutral(R). This means the carbon footprint of the facility has been reduced to net zero through the use of iRECs for our Scope 2 and carbon offsets for our Scope 1, that meet the requirements of the CarbonNeutral Protocol(R). We are committed to maintaining this CarbonNeutral(R) status year-on-year.
Other emissions reduction activities		<Not Applicable>

Other		<Not Applicable>		

C7.9b

(C7.9b) Are your emissions performance calculations in C7.9 and C7.9a based on a location-based Scope 2 emissions figure or a market-based Scope 2 emissions figure?

Market-based

C8. Energy

C8.1

(C8.1) What percentage of your total operational spend in the reporting year was on energy?

Don't know

C8.2

(C8.2) Select which energy-related activities your organization has undertaken.

	Indicate whether your organization undertakes this energy-related activity
Consumption of fuel (excluding feedstocks)	Yes
Consumption of purchased or acquired electricity	Yes
Consumption of purchased or acquired heat	No
Consumption of purchased or acquired steam	No
Consumption of purchased or acquired cooling	No
Generation of electricity, heat, steam, or cooling	No

C8.2a**(C8.2a) Report your organization's energy consumption totals (excluding feedstocks) in MWh.**

	Heating value	MWh from renewable sources	MWh from non-renewable sources	Total MWh
Consumption of fuel (excluding feedstock)	LHV (lower heating value)	185.82		185.82
Consumption of purchased or acquired electricity	<Not Applicable>	22947.64		22947.64
Consumption of purchased or acquired heat	<Not Applicable>	<Not Applicable>	<Not Applicable>	<Not Applicable>
Consumption of purchased or acquired steam	<Not Applicable>	<Not Applicable>	<Not Applicable>	<Not Applicable>
Consumption of purchased or acquired cooling	<Not Applicable>	<Not Applicable>	<Not Applicable>	<Not Applicable>
Consumption of self-generated non-fuel renewable energy	<Not Applicable>	<Not Applicable>	<Not Applicable>	<Not Applicable>
Total energy consumption	<Not Applicable>	23133.47		23133.47

C8.2b**(C8.2b) Select the applications of your organization's consumption of fuel.**

	Indicate whether your organization undertakes this fuel application
Consumption of fuel for the generation of electricity	No
Consumption of fuel for the generation of heat	No
Consumption of fuel for the generation of steam	No
Consumption of fuel for the generation of cooling	No
Consumption of fuel for co-generation or tri-generation	No

C8.2c**(C8.2c) State how much fuel in MWh your organization has consumed (excluding feedstocks) by fuel type.****Fuels (excluding feedstocks)**

Diesel

Heating value

LHV (lower heating value)

C10.2

(C10.2) Do you verify any climate-related information reported in your CDP disclosure other than the emissions figures reported in C6.1, C6.3, and C6.5?
Yes

C10.2a

(C10.2a) Which data points within your CDP disclosure have been verified, and which verification standards were used?

Disclosure module verification relates to	Data verified	Verification standard	Please explain
C6. Emissions data	Year on year change in emissions (Scope 1 and 2)	ISO14064-3	We have verified our reduction in Scope 1 and 2 emissions in 2018. This year, and for the first time, our manufacturing facility is certified CarbonNeutral(R). This means the carbon footprint of the facility has been reduced to net zero through the purchase of iRECs and carbon offsets that meet the requirements of the CarbonNeutral Protocol(R).

C11. Carbon pricing

C11.1

(C11.1) Are any of your operations or activities regulated by a carbon pricing system (i.e. ETS, Cap & Trade or Carbon Tax)?
No, and we do not anticipate being regulated in the next three years

C11.2

(C11.2) Has your organization originated or purchased any project-based carbon credits within the reporting period?
Yes

C11.2a

(C11.2a) Provide details of the project-based carbon credits originated or purchased by your organization in the reporting period.

Voluntary Offsetting

C11.3

(C11.3) Does your organization use an internal price on carbon?

No, and we do not currently anticipate doing so in the next two years

C12. Engagement

C12.1

(C12.1) Do you engage with your value chain on climate-related issues?

Yes, our suppliers

C12.1a

(C12.1a) Provide details of your climate-related supplier engagement strategy.

Type of engagement

Information collection (understanding supplier behavior)

Details of engagement

Collect climate change and carbon information at least annually from suppliers

% of suppliers by number

12

% total procurement spend (direct and indirect)

81

% Scope 3 emissions as reported in C6.5

Rationale for the coverage of your engagement

In recent years we have been working with Tier 1 (Direct) Suppliers to develop oversight of Scope 3 emissions from supplier manufacturing. In 2018 we engaged with suppliers accounting for 81% of our direct spend on supplier manufacturing and asked them to report their Scope 1 and 2 emissions in a format aligned with the GHG Protocol. Using assumptions we have extrapolated the survey data to estimate the total greenhouse gas emissions from Tier 1 (direct) supplier manufacturing is approximately 110,000 tCO₂e.

Impact of engagement, including measures of success

This engagement has helped us to understand our Scope 3 emissions from our Major Suppliers. In 2018 we have increased our supplier engagement to 81% of our total spend, up by 18% from 63% last year. And we successfully collated data accounting for 73% of our spend, up by 12% from 61% last year.

Comment

Type of engagement

Engagement & incentivization (changing supplier behavior)

Details of engagement

Other, please specify (Supplier Carbon scoring system)

% of suppliers by number

12

% total procurement spend (direct and indirect)

81

% Scope 3 emissions as reported in C6.5

Rationale for the coverage of your engagement

For our most recent engagement, suppliers who responded to the survey and reported accurate data were rewarded with a QBR Score. QBR scores are used in Logitech to focus supplier attention on priority issues of importance. As such, the introduction of this new scoring system emphasises the importance of survey participation and accurate data reporting as well as Logitech's commitment to energy and greenhouse gas issues. We are also awarding a Logitech Torch Award based on the most recent survey effort - to recognise and celebrate the supplier with most improved energy performance, compared to last year. The introduction of this new Torch Award will also help to focus supplier attention on the importance of energy management and incentivise continued good performance over the forthcoming period.

Impact of engagement, including measures of success

The response rate of suppliers increased compared to previous years. The impact of the Torch Award will be reported next year.

Comment

C12.3

(C12.3) Do you engage in activities that could either directly or indirectly influence public policy on climate-related issues through any of the following?

No

C12.3g

(C12.3g) Why do you not engage with policy makers on climate-related issues?

We are developing our engagement strategy at present to include engagement with SBTi and other climate-focused global initiatives

C12.4

(C12.4) Have you published information about your organization's response to climate change and GHG emissions performance for this reporting year in places other than in your CDP response? If so, please attach the publication(s).

SC. Supply chain module

SC0.0

(SC0.0) If you would like to do so, please provide a separate introduction to this module.

Our high-volume manufacturing site was established in Suzhou, China in 1994. On-site activities primarily comprise final assembly and testing. Components are manufactured to our specification by suppliers in Asia, the United States and Europe. We use contract manufacturers to supplement internal capacity and to reduce volatility in production volumes. Approximately half of our annual revenue is generated from products that are manufactured in-house. The other 50% of our revenue is generated from products which are manufactured by Finished Goods suppliers and Contract Manufacturers under our direction.

Our continued success is coupled to the continued success of our suppliers. We look to establish long-term relationships with a core group of suppliers, based on shared values of ethics, good practice and RBA Code compliance. Our local and international teams maintain oversight of all in-house and supplier production activities, manufacturing know-how, quality process controls, social and environmental responsibilities and Intellectual Property protection. This hybrid model of in-house manufacturing and third-party manufacturers enables us to effectively respond to rapidly changing demand, leverage economies of scale, maintain strong quality process controls, reduce volatility in production levels, and optimise time to market

SC0.1

(SC0.1) What is your company’s annual revenue for the stated reporting period?

	Annual Revenue
Row 1	2788322000

SC0.2

(SC0.2) Do you have an ISIN for your company that you would be willing to share with CDP?

Yes

SC0.2a

(SC0.2a) Please use the table below to share your ISIN.

	ISIN country code (2 letters)	ISIN numeric identifier and single check digit (10 numbers overall)
