

YOUR GUIDE TO MAKING ROOM FOR SUCCESS WITH LOGITECH ROOM SOLUTIONS

Video conferencing has never been more popular than it is right now – so it makes sense that advanced all-in-one video conferencing solutions, incorporating video, audio and microphone, are in higher demand than ever before, and that investing in this is the number one priority for businesses right now. But what makes them so much better for you and your business? We believe success is as simple as having the right equipment, so let's explore what you could achieve by upgrading to Logitech Room Solutions.

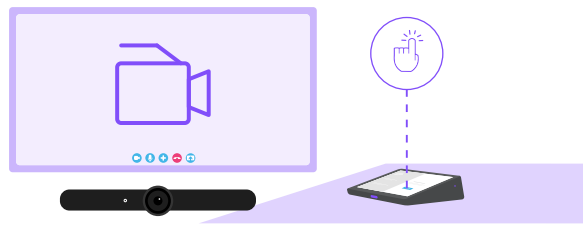

ENHANCING THE USER EXPERIENCE

1 IN 3 EMPLOYEES

worldwide are requesting better video conferencing equipment, so looking and sounding good on camera is a clear priority for teams – and with Rally Bar's cinema quality video and audio, motorized pan and tilt, and AI viewfinder, your team will always be shown in their best light.

Save time with one-touch joining from the calendar-integrated Logitech Tap. Simply walk into the meeting room and tap once to join or leave calls. Simple, hygienic, hassle-free, and pre-configured with your choice of room-optimized software.

Logitech's Rally Bar and Rally Bar Mini for huddle rooms **make joining and starting meetings easy**. By providing a seamless, user-friendly experience, these all-in-one video conferencing bars eliminate fears that new solutions may become a burden on IT departments by reducing trouble tickets.

46% OF ORGANIZATIONS

will either need more meeting rooms or larger meeting rooms as office life returns, which means huddle and break out areas will need to be transformed into dedicated meeting spaces – something that the Logitech Small Rooms bundle is perfectly equipped to handle.

OPTIMIZATION

The Rally and Rally Bar Mini cameras come integrated with Logitech RightSense™ technologies as standard.

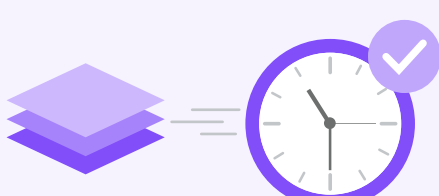

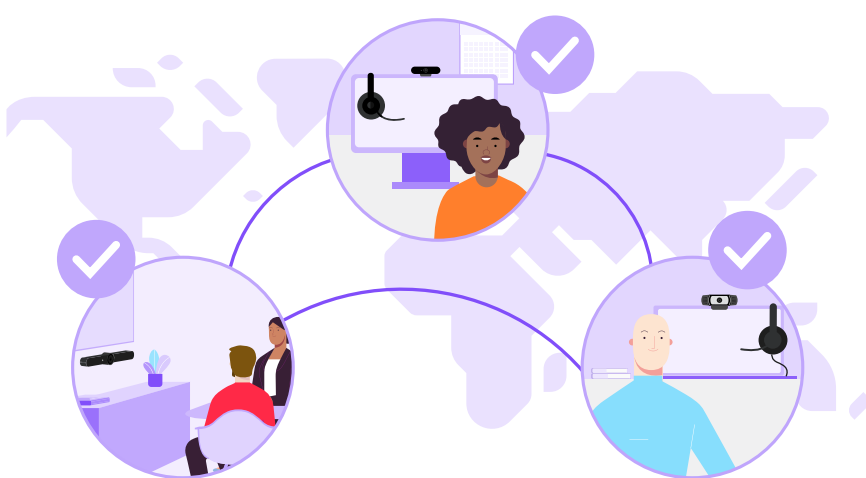

This includes RightSight, which automatically adjusts the camera and focuses on whoever's speaking, RightSound for audio optimization, and RightLight to intelligently tweak lighting conditions.

SIMPLIFYING IT MANAGEMENT

EXPERIENCE

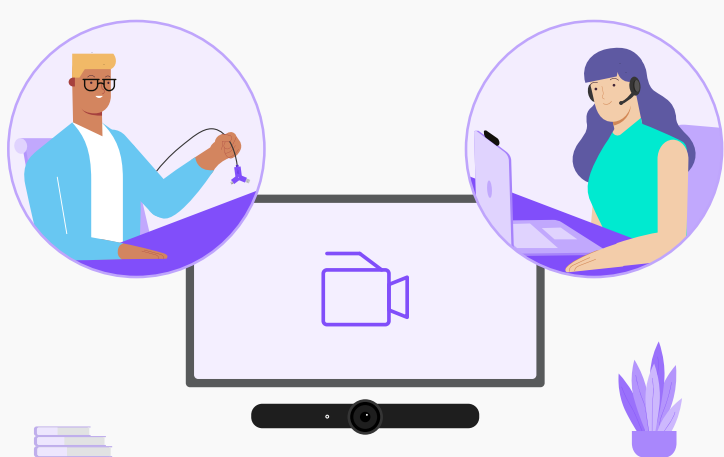

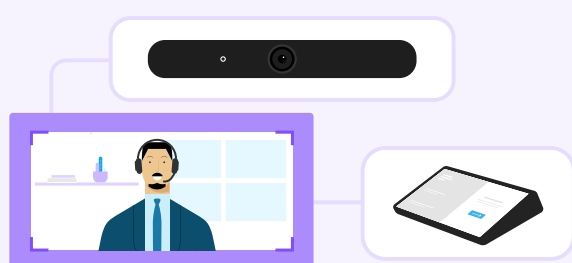

Logitech Room Solutions were designed with one purpose in mind: improving the video conferencing experience for businesses and their IT teams.

The top three requirements for deploying video across an organization were:

- 1 Easy procurement
- 2 Fast installation
- 3 A full-stack management experience

1 in 3 IT decision makers and business leaders listed manageability challenges and complex integrations as a key concern around investing in video conferencing solutions.

EASY TO MANAGE REMOTELY

The Logitech Room Solutions were designed to be as simple to integrate into the way you work as possible, so we made sure every solution is compatible with your favorite video conferencing platforms, operating systems, and devices through Logitech Sync.
